

Services

- European Design Center
- 3-D modeling
- Prototyping
- Sample Case Express
- Co-Engineering
- Serial Production

Quality

- ISO 13485: 2003

EuropTec is dedicated to

Speed

Time to market is a key factor. That's why our project managers have in-depth technical know-how and manage the projects themselves. By deploying efficient project management and a modern, in-house production facility we gain a huge speed advantage. With our European Design Center we meet best our customers' needs one time.

Quality

Quality is mandatory for success. For us, quality means primarily fulfilling our customers' expectations. Our high customer satisfaction ratings and low returns rates are evidence of our high standards.

Innovation

Our Cases and Trays are characterized by advanced design combined with innovative ideas. These solutions generate high flexibility, modularity and increased functionality.

EuropTec AG

Medical Division

Orthopaedic Implants and Instruments

EuropTec AG, Med-Tech Division, applying the most advanced production-methods in surface-technology, polymer- and metal-processing for trays incl. labelling, further expanded now into design and manufacturing, jointly with our clients, various implants in materials like the certified PEEK-Optima®

Implants, that may range from prosthetic replacement devices to spinal implants. Our Project-Management works also on complete solutions, including auxiliary instruments and Cases & Trays, see overleaf.
